

Babcock | LGE

Babcock LGE Service

Built to perform today. Supported to keep performing tomorrow.

Babcock LGE is a world-leading provider of cargo handling and fuel gas supply systems for the liquefied gas markets. Our environmentally focused technologies improve efficiency and enhance performance, delivering value to customers throughout the vessel's lifetime.

Babcock LGE Service combines original system design knowledge, in-service engineering, digital insight and global support to keep gas systems performing throughout the operational life of the vessel. As equipment, controls, and operating requirements change, we help owners and operators maintain performance, recover capability, and develop their systems over time.

Through-life support:

Service agreements and support packages

Through-life support tailored to the vessel, fleet and operating requirements.

Planned maintenance:

Dry-dock support

Managed dry-dock scopes from plant health-check and preparation, through to service and re-commissioning.

Uptime:

Spares and parts management

Strategic spares and parts planning focused on balancing availability, cost, and system uptime.

Performance:

Monitoring and diagnostics

Near real-time plant performance monitoring and diagnostics through Igecosystem®.

Development:

Upgrades and retrofits

Control system modernisation, system upgrades and retrofit engineering with ecoEVLV™ to improve capability over vessel life.

Capability:

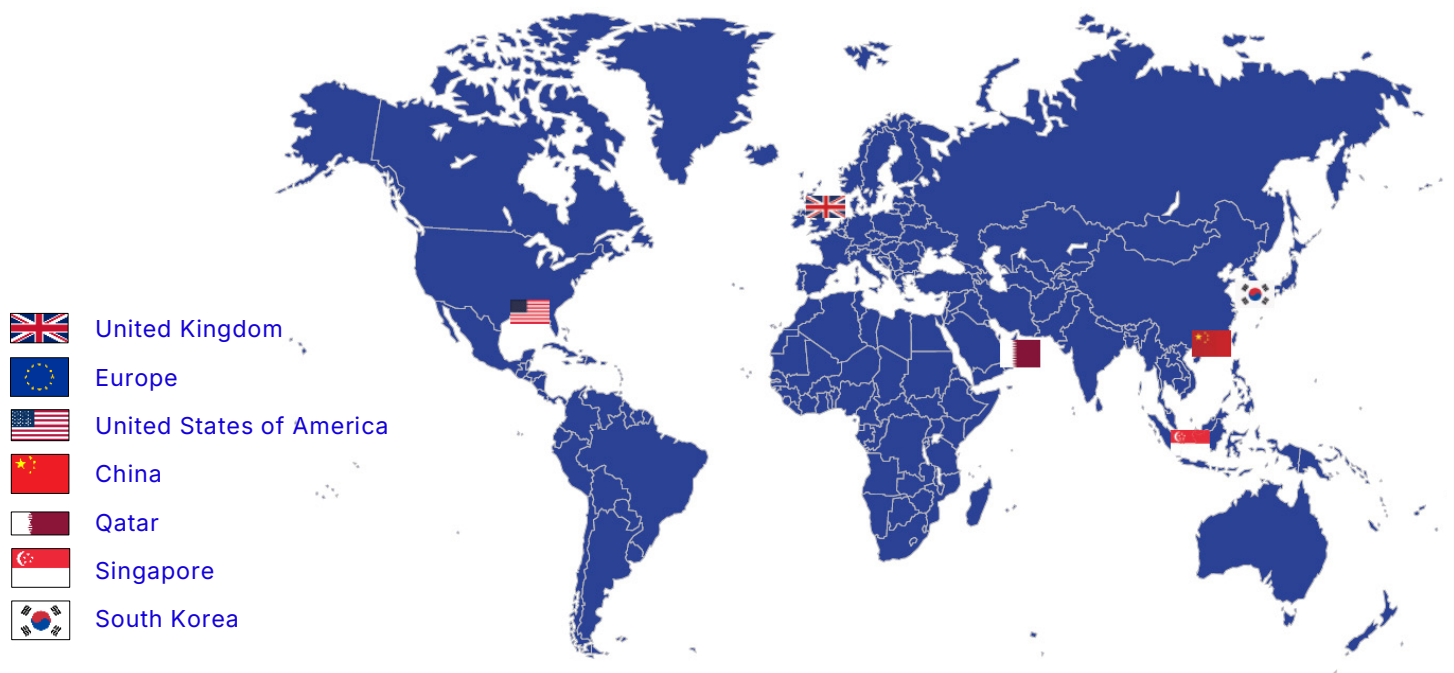

Health checks and obsolescence management

Keep installed systems supported and reliable as equipment and technology age with ecoLFEX™.

Support positioned where the fleet needs it

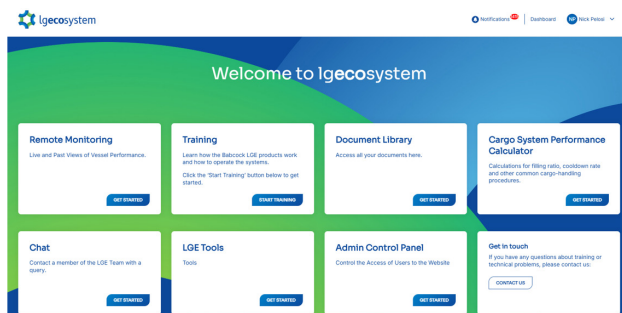

Babcock LGE has established service engineer capability and supply-chain support at strategic locations worldwide, supported by its UK engineering base and wider Original Equipment Manufacturer (OEM) network. Dedicated tooling, spares and specialist capability are positioned around the locations where vessels operate and dry-dock.

We work in partnership with ship owners, building enduring relationships and adding value through the life of the vessel.

Igecosystem® - keep vessel performance connected to Babcock LGE engineering

Igecosystem® connects ship owners and Babcock LGE Service to plant performance and support throughout vessel operation. It brings monitoring, diagnostics, training, spares and engineering access together in one digital environment.

Remote Monitoring: Live and historical plant performance visibility.

Performance Diagnostics: System health-checks and engineering insights.

Engineering Access: Direct connection to Babcock LGE Service support.

Training and Spares: Online training, technical information and parts support.

Document Library: Historical service records, scheduled maintenance planners and technical bulletins.

Keeping the engineering behind your system connected.
